AS/400 Tools

The AS/400 system offers a full set of tools that you may find useful for programming.

Application Development ToolSet for AS/400

Application Development ToolSet for AS/400 (ADTS) provides an integrated suite of host-based tools designed to meet the needs of the application developer. This product provides tools for manipulating source, objects, and database files on the AS/400 system. Some of the tools provided are: PDM, SEU, and SDA. A menu driven interface is available from which you can perform all of the tasks involved in application development, such as object management, editing, compiling and
